Once the Max Bid is entered, you can change it until the horse goes in the ring. In this example, a Max Bid of \$50,000 has been placed on Hip 14. In order to change it you would click "Clear Max Bid" to clear the amount and start over. Be very careful with your Max Bid.

When the horse upon which you have placed the Max Bid moves into the ring, the Max Bid moves over to the area above the bid button. As you can see here, the \$50,000 Max Bid appears above "New Lot" This is what you will see when the horse enters the ring.

As you see in this example, even though you entered a Max Bid of \$50,000 you have bought the horse for \$20,000 because no one else bid against you. The Max Bid function will not run the horse all the way to \$50,000.
